

## APPEAL

We are launching a new appeal today to raise funds to help someone very special.

From the age of just 9 this incredibly brave young woman has undergone a series of illnesses starting with osteosarcoma (cancerous bone tumour) which resulted in the shoulder and upper arm bone being removed and replaced with a titanium prosthesis.

The aggressive chemotherapy for this caused damage to her heart and she suffered a full stroke. The damage to her heart was so severe that she had to undergo a full heart transplant and now has a much reduced immune system. As this were not enough to endure she then developed Non Hodgkins Lymphoma.

More chemotherapy has put her in remission but the future is uncertain. Having lost out on much of her childhood and adolescence through illness, she is now trying to catch up on her schooling and has, since September been attending college.

Zoe's Wish has been asked for help with the cost of a computer and to provide funds for a respite break. Please share this appeal with as many of your friends as you can and if everyone could spare just £1 or €1 or \$1 we can make a difference to the lives of this girl and her family
